TOUCHED SURFACES**

CDC Health Advisory Chloroquine Phosphate

The Centers for Disease Control and Prevention has issued an advisory after **two people used non-pharmaceutical chloroquine phosphate to try to treat COVID-19.**

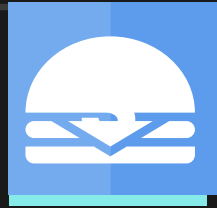

Chloroquine phosphate, when used without a prescription and supervision of a healthcare provider, **can cause serious health consequences, including death.**

Clinicians and public health officials should discourage the public from misusing non-pharmaceutical chloroquine phosphate (a chemical used in home aquariums).

Clinicians should **advise patients and the public that chloroquine, and the related compound hydroxychloroquine, should be used only under the supervision of a healthcare provider as prescribed medications.**

CORONAVIRUS DISEASE 2019 (COVID-19)

Patients with COVID-19 have reportedly had mild to severe respiratory illness. Symptoms can include

- Fever
- Cough
- Shortness of breath

*** Symptoms may appear 2–14 days after exposure.**

Seek medical advice if you develop symptoms, and have been in close contact with a person known to have COVID-19 or if you live in or have recently been in an area with ongoing spread of COVID-19.

www.cdc.gov/covid19-symptoms

CORONAVIRUS DISEASE 2019 (COVID-19)

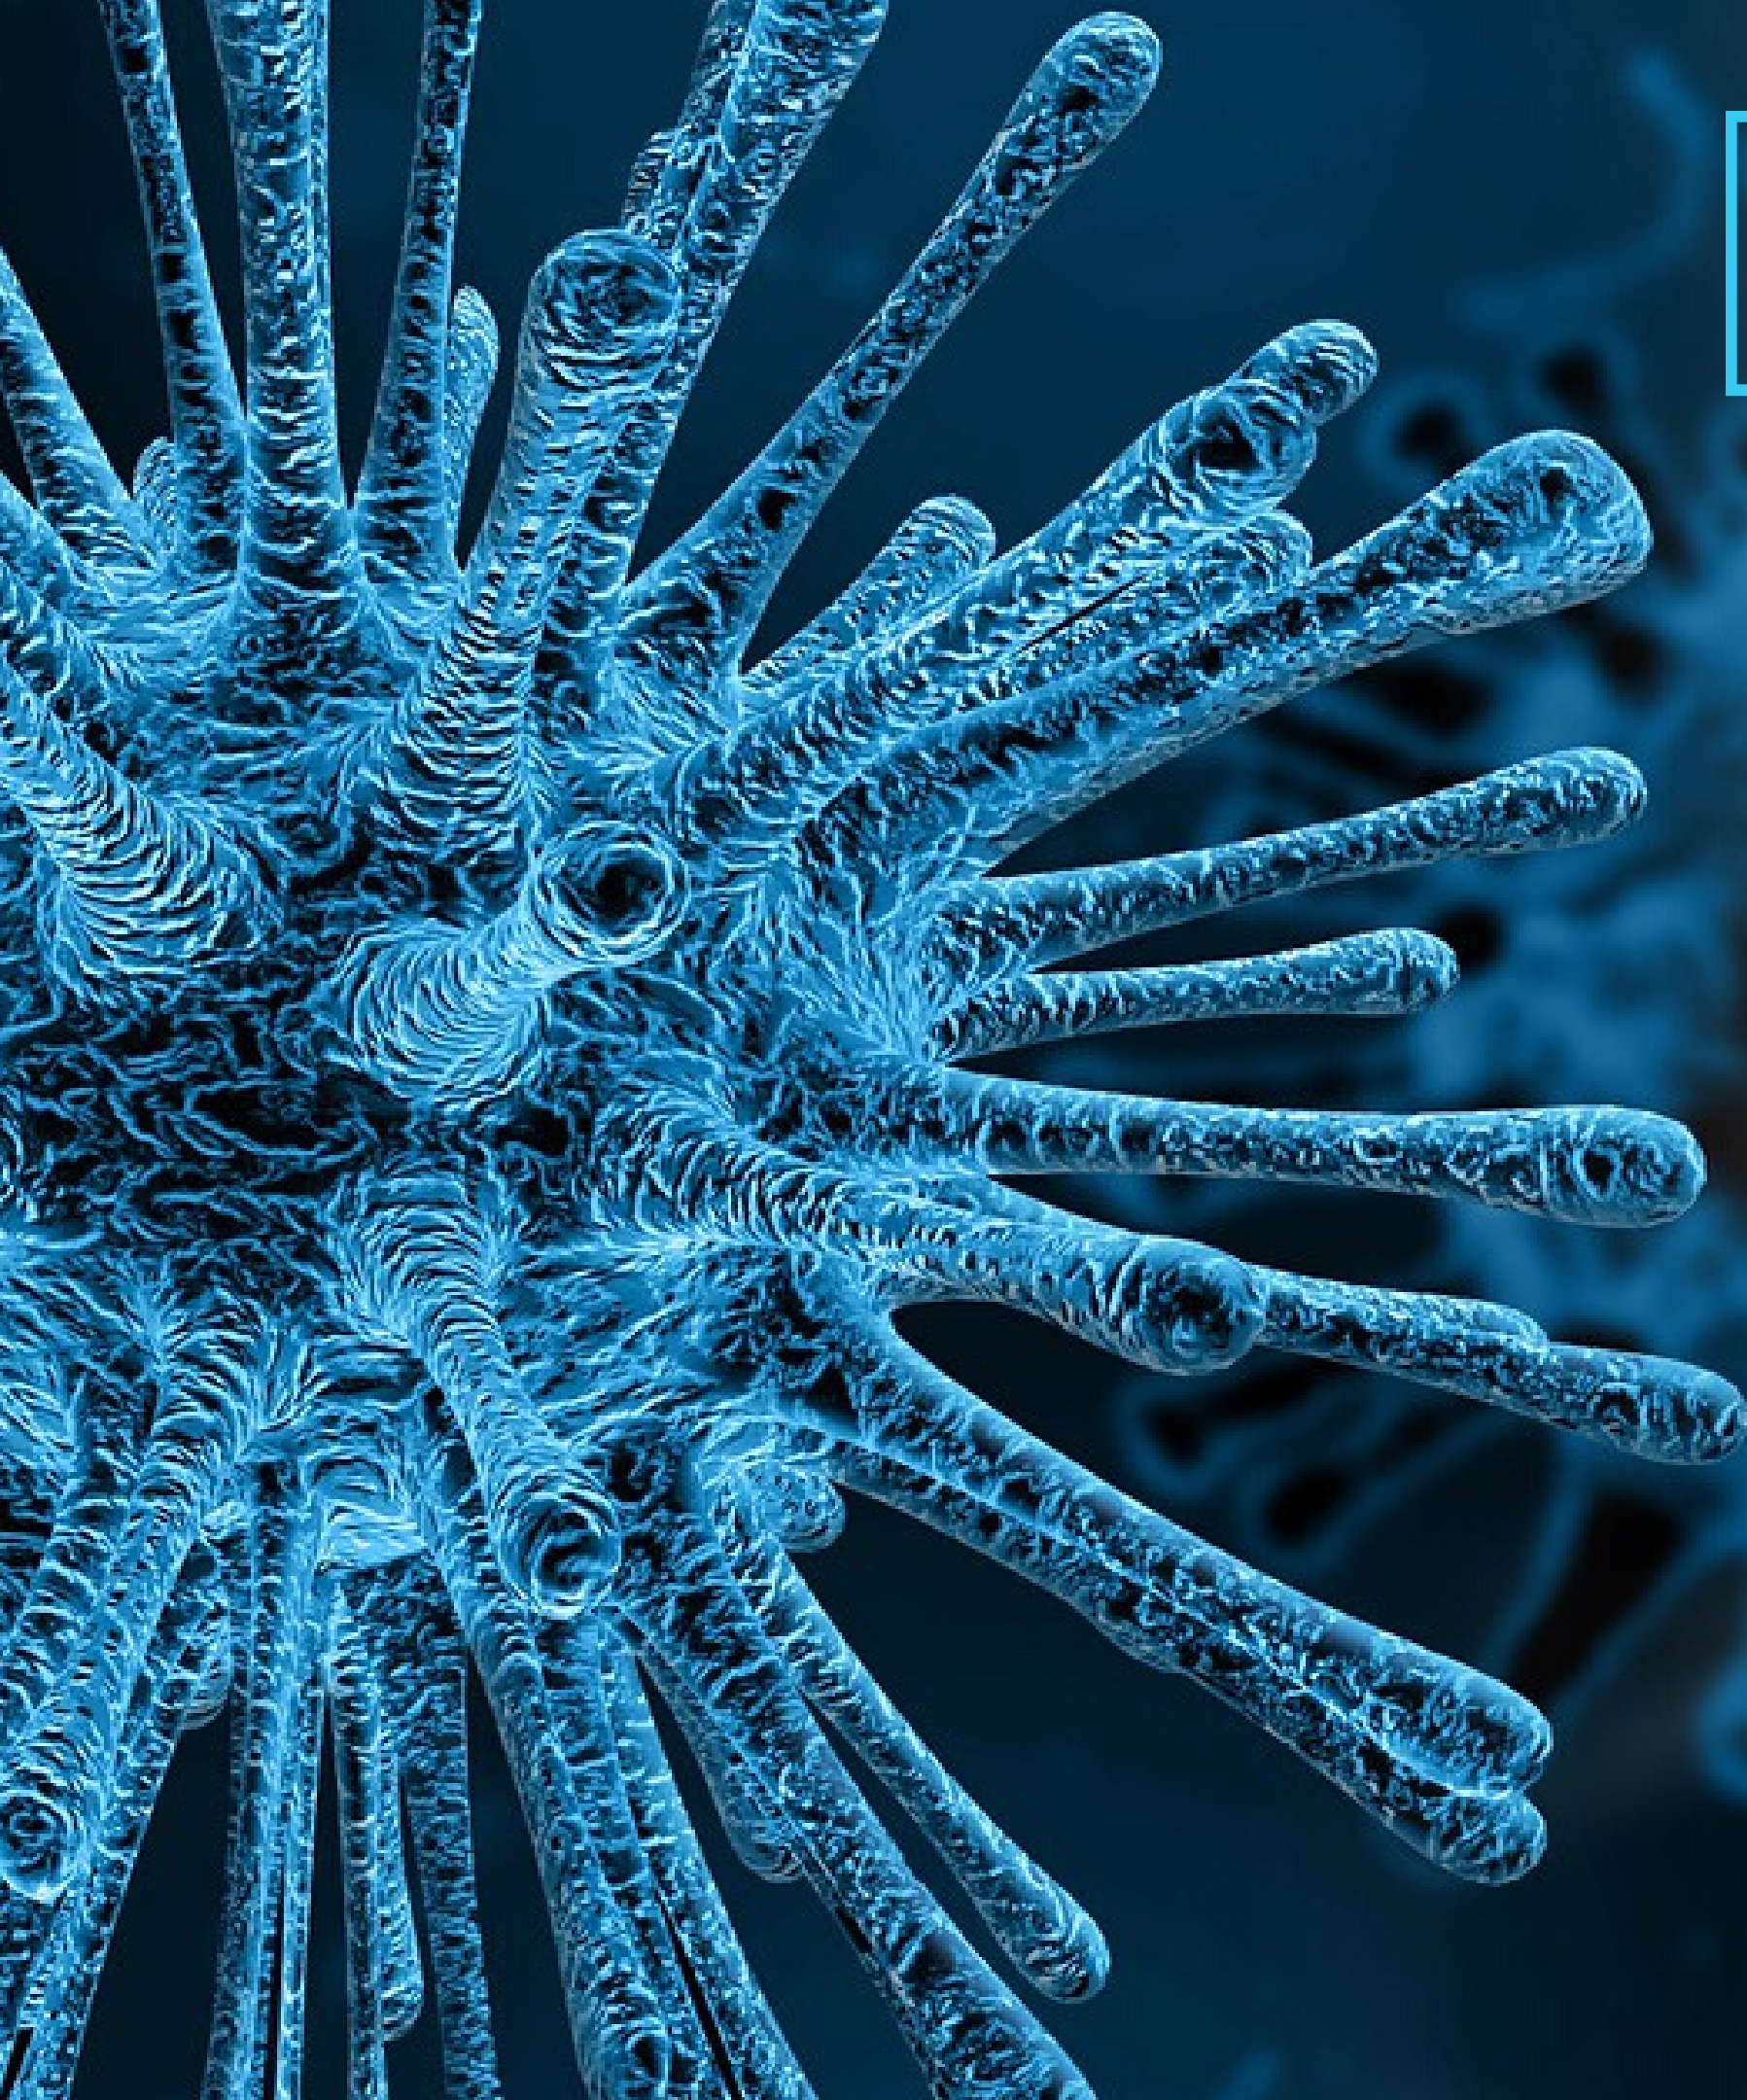

You can help prevent the spread of respiratory illnesses with these actions:

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose & mouth.
- Wash hands often with soap & water for at least 20 seconds.
